

AIR SYSTEM DIAGNOSTICS KIT

Conducting a system air survey is one of the most important steps in balancing a new or trouble-shooting an existing system. The Osprey air system diagnostic kit includes all the tools required to complete a thorough air system survey and is now available to customers.

Features:

- Pelican case with retractable handle and wheels.
- Die-cut foam set to organize, hold, and protect instruments.
- Fluke airflow meter with digital readout.
- Set of magnehelic gauges ranging from 0-2" to 0-60" wc.
- Ammeter and Tachometer for measuring amperage and RPM.
- Metric and compact models available.

Accessories:

- Flashlight, screwdriver, pliers, and tape measure.
- Safety glasses, hearing protection, gloves, and dust masks.
- Duct hole seals and matching drill bits.
